Crimes Of The Educators: How Utopians Are Using Government Schools To Destroy America's Children

Synopsis

Utopian dictators like Stalin, Hitler, Pol Pot, and Mao are criminals genocidal psychopaths who have killed more human beings in the last hundred years than any other ideologues in history. They don't limit their murder to individuals, but to entire nations. In the United States another form of utopians, the progressives; have tried to destroy traditional America by strategically dumbing down her people. America's future is being crippled on purpose in order to fundamentally transform the nation, its values, and its system of government. Laid out a century ago by progressive luminary John Dewey, the fruits of his schemes are plain to see today. Dewey got rid of the traditional intensive phonics method of instruction and imposed a look-say; sight; or 34;whole-word; method that forces children to read English as if it were Chinese. The method is widely used in today's public schools, which is a major reason there are so many failing public schools that cannot teach children the basics. This can only be considered a blatant form of child abuse. American author and veteran educator Samuel Blumenfeld and journalist Alex Newman have taken on the public education establishment as never before and exposed it for the de facto criminal enterprise it is. Crimes of the Educators

Customer Reviews

Every teenager and adult, especially ALL educators should read this book!!!! They will finally learn WHY America's educational system is NOT No. 1 in the World, though we are the wealthiest nation

and spend the most money on public education! A deliberate plot in the 1800's by a very few who wanted to create a populace able to do basic jobs, but NOT realize that there is so much more to know about the world. Socialists to the core who realized that America was becoming a world economic and financial power house and wanted to corrupt us so that they could corrupt our Capitalistic economy and install Socialism. If you want to know what our educational system used to be from the time of our founding until latter part of the 1800's/early 1900's, examine the old primers and textbooks. I have an extension collection of textbooks and primers from the 1800's and early 1900's. Many children had to go to work before they were teenagers and yet, they read at a high school level or better! Use your search engine to view the "1895 Salina, Kansas 8th Grade Exam". I guarantee that you and 99% of college professors cannot pass it! I have collected letters from Civil War soldiers writing home and view lovely prose and penmanship. One of the most startling facts that angered me was that WHOLE READING destroyed most of the ability to read and spell well. To learn that whole reading also forces the right side of the brain to be used instead of the left side when learning to read in many schools (the right side of the brain governs our spatial abilities and the left side governs more of our verbal abilities) was shocking. It often results in ADD and ADHD in children, especially boys who are usually BORN more right brain, and girls usually more left brain and verbal.
