I would have liked to see a little more detail. It covered the basics, but I found it to be a bit confusing. I think this book would be best followed if you completed the actions while reading the book. It will take time, understanding, and practice to use this method. The author does make this clear, practice, practice, practice. You will need somewhat of an analytical mind to decipher this method. I believe with the use of a spreadsheet, this can be configured to a skill, but the lotto is still the luck of the draw.

I usually don't go for lottery tickets but when I got this book I was really curious to buy lottery tickets. I followed the book and selected my lottery number according to the technique given in the book. I won a good prize and I am looking forward to buy more tickets.. Recommended to all..

The writer's system to selecting lottery numbers is outlined in this book. The material is presented with the idea that no one can predict what numbers will be drawn, but that following certain principles and pseudo-trends, the elements of chance can be minimized and your chances of winning will improve. Interesting read if you have some free time.

I must say I was a bit hesitant when I first decided to buy this book. My father bought lottery tickets for years and never won anything. My mother and her brother would get together every Friday and play the Lotto. They were not successful in winning anything either! So it is my conception that I would not win anything as well. But I eventually bought this book and boy I was not disappointed! The instructions are very clear, easy to follow, so now I can choose my lottery tickets numbers wisely and not just at random.

This book is awesome, it was exactly what I was looking for. I'm trying to learn as much as I can about gambling and lotteries right now and reading this book was gold for me! Great information, tips and advices that everyone should take a part of. Thanks for sharing!

While you may not win millions, there is something to be said to using a scientific approach to selecting numbers for the lottery. With any system that picks numbers at random, especially those that use machines and balls with numbers on them (like most lotteries), the randomness you seem to see is not so random. Every machine and every ball has its own unique set of characteristics, and it is true that certain numbers appear more than others. Using James Dunkin's methods in this book you can learn to identify those numbers and then pick your numbers more efficiently.

Another book for my Dreams of winning a big lottery some new material and some old that is covered in Gail Howard's Books. Basically the winners play a lot of different numbers, in fact today I played 80 number sets and I am hopeful that Monday will find myself a new winner. I am not a rich man and I live in Spain and I play Bonolotto for .50 cents per bet so this only cost me 40â ¤. Perhaps I will win and perhaps not, but I will keep buying tickets every couple of weeks

Now, there is much smarter way to play lottery! Don't be just a luck seeker sitting in your comfort zone hoping to get a fortune out of nothing. Now with this book you got techniques, tips, tricks, history lessons and many more to make your chance win the lottery much higher. Go and work hard. Good luck.
