Month-by-Month Gardening In Florida

Synopsis

Never garden alone! The Month-By-Month series is the perfect companion to take the guesswork out of gardening. With this book, you'll know what to do each month to have gardening success all year. Written by authors in your state, the information is tailored to the issues that affect your garden the most. When is the best time to plant trees and shrubs? Should I fertilize my lawn now? Is it time to prune my roses? What should I be doing in my garden this month? You'll find the answers to these questions and much more inside. This easy-to-use book highlights each of the ten major plant categories using a monthly format. It guides you through each month of the year, telling you exactly what your garden needs. It is like having an expert in the garden with you all year long. Valuable hints are located throughout the book, and beautiful photographs will inspire you. Written just for gardeners where you live, you can be confident that the information is right for you-and your garden will show it.

Customer Reviews

The minute this anxiously-awaited book arrived I cut away its tenacious shrink-pack wrapping and started reading. Over a period of one evening and the next morning I went through the table of contents and several chapters of personal interest, followed by browsing through several more chapters. To put my comments in context I should note that my wife and I had a condo in south central coastal Florida for many years and were limited to a bit of container gardening on the lanai. However, last year we moved into a house with a large yard that contains oaks, palm trees, several types of as-yet unidentified jungle-looking plants, hibiscus, liriop, bougainvillea, a couple of banana

trees, a lime tree, a Meyer lemon tree, and on and on. With such a wonderful plant assemblage we of course want to maintain the yard properly and add to it in a way that will enhance an already attractive setting. The particular value of this book is that it provides, as its title indicates, a calendar of what one should be doing each month with each major category of plant: annuals, bulbs, citrus, fruits, herbs and vegetables, houseplants, lawns, perennials, roses, shrubs, trees and palms, vines and grasses, and water gardens. For example, I am writing this review in January and in order to know what I should be doing in the yard this month I go to the chapter on shrubs and turn to the January page, go to the chapter on citrus and turn to the January page, etc. The difficulty is that Florida has several climate zones and sub-zones and the plants that will survive and prosper in one zone may not make it in others.
