Customer Reviews

This book is an easy read with step by step directions to help manifest. I really enjoyed this book and am working on the exercises. I practice Mindfulness Meditation and have added visualizations as

well. Positive opportunities have been flooding to me ever since. Really good book.

This book reminds me a lot of Tony Robbins and self development works because they all teach you about manifesting your goals or visualizing your goals as if they have come true then actually going out there take action and create that reality. It was a good read overall, there were some amazing principles like visualizing and verbalizing, which I love doing. Great read.

This book explains how to use manifestation to achieve any goals in life such as goals in relationships or money. This book is short however it provided me great tips and I plan to use them in near future. The author convinced me that our mind is extremely powerful if we use it correctly. Great book.

It's well written and perfect for everyone. This book contains lots of information and techniques. This book will help you to think positively and how to attract things you desire in life. I found it very informative and very easy to read. After reading this book I learned many things. I really learned a lot about perspective and looking at things the right way.
