When I review books there is always a reason. I've been doing book reviews for a long time, but it is

not often that something strikes close to home. In this case, I chose this book from my Kindle First selections solely because of the author. Marcia Clark is a well known entity. Well, at least if you are old enough to remember the O.J. Simpson trial. You see, Marcia Clark was a prosecuting attorney for the Los Angeles District Attorney in the trial of O.J. Simpson. I remember her well.... Since that time Ms. Clark has written several novels and I've now read two of them. This book, Blood Defense, is the best of Marcia Clark's efforts. It is tightly written and well plotted with a well-developed story line. I noticed very few errors that would cause reading discomfort anywhere in the book. The proof readers and editor have done a very nice job. The characters have been highly developed and although the book resides solidly within typical crime and courtroom procedurals, the characters do not seem type cast or stereotypical in any way. In fact, just the opposite. These characters seem almost plebeian by comparison to most others in this genre. They all seem fully capable and yet quite "common" in nature, and never afraid to get their hands dirty or use coarse language if the situation calls for it. Rough and tumble female leads that take part in difficult law environments. Not your typical stuff.....Unlike some courtroom dramas that seem to plod along in places, Ms. Clark writes in a manner that keeps her characters active and alive. The dialogue is very well done and seems to be almost too realistic. The language gets a little coarse at times but it always seems to be appropriate to the situation.
