## **Customer Reviews**

First off, I am very surprised there is only one other review for such wonderful book:-(In my nursing school the game is called "Students, teach yourself!". Almost no one depends on the teachers. They are basically jaded nurses who ended "educating" to avoid the responsibilities of being a hospital nurse. So, the students at Keiser depend on a good textbook. However, each chapter is about 50 pages. Too long if you have to digest 2 or 3 chapters a week. From the start, I felt fairly attached to this book because the chapters are actually manageable and condensed. Moreover, it emphasizes the important information on the sidelines, the kind of stuff you underline with a marker, only the authors did an outstanding job for you. The pictures provided just enough to illustrate difficult

concepts. Everything I needed for the tests was given in a clear and concise manner. I like the fact that the book provides the tests before and after each chapter. There are about 30 additional questions per chapter on the cd that comes with it. I found a well-researched article that suggested the best way to study is to take a test first, even if you don't know the subject-this will orient you in the right direction and will put the foundation to promote learning. After spending about 10 hours per week reading my class textbook, I gave up, and completely relied on this book. In this particular class, the tests were not very comprehensive, but I suspect that in any other school, one would find this book as useful and valuable as it covers material in the same order as covered in my class. This book is a real deal and true help. This one I won't sell after the class is done, I got attached to it.
