Honestly this text book is just full of news clips and stories illustrating the subject being taught. I was disappointed with this text book. I love some examples of application or real life stories on the subjects I am learning but this text book was too cluttered with them.

This book is structured horribly and is very biased. I feel like most of it is just ramblings slapped on paper. One major thing I could not stand was that the book is completely one-sided (Democratic). It's hard to focus on the facts in this book when I keep running into one-sided arguments. I feel like the author is trying to shove their views down my throat. The only thing I enjoyed out of this book was the numerous court cases that it presented. Other than that, would not recommend.

This was a required book for my Health Care Ethics class. I personally did not like the way the book was set up as it gave no real definitions of the concepts discussed. All the real life cases were interesting to read but we're not always easy to follow and we're often times distracting from the actual text.

The book was more or less useless for the class it was assigned to. Most of the issues discussed in the class were common sense, or easily found on the internet, so I only opened this book once the entire semester only to find that it had no valueable info in it.

I found that the layout of the content or sections of each chapter are difficult to follow. Childlike in nature.

I found this to be a needed book for the healthcare profession, and would recommend it to anyone in the business. It was very helpful for my healthcare ethics class. The subjects covered were pertinent to the profession, and they were covered well,

This was a required text for school, arrived quickly, as advertised. Just a few more classes and I will be done with school. In the meantime, it really helps to be able to get textbooks cheaper from sources other than the school bookstore.

This book arrived in a reasonable amount of time. It was quite helpful to me in my course. Contains loads of informative information relating to the medical field. I was able to obtain an "A" in this class.
