Stink: Solar System Superhero

Synopsis

Save the planet . . . Pluto! Stink Moody, wise-cracking champion of everything small, is on a new mission: to reinstate his favorite celestial orb. Look! Up in the sky! Is it a falling leaf? A speck of dust? A speeding mosquito? No, it's Stink Moody, Solar System Superhero! When Stink learns that Pluto has flunked out of the Milky Way for being too shrimpy, he feels like he might just explode with a Big Bang. Stink has no choice but to take a stand for the sake of little planets (and little people) everywhere. Will he be smart enough to defeat a panel of big-shot scientists? Will he be strong enough to beat know-it-all Riley Rottenberger and her "Team KPB"? Will he succeed in rescuing Pluto from a fate worse than being swallowed by a black hole? Start the countdown for a funny (and very informative) out-of-this-world adventure—and prepare to have your universe rocked!

When Stink Moody begins preparing for his science test the next day, he realizes he has to stuff his brain with facts about all the planets in the solar system. Stink only knows about Saturn, so he decides to get help from big sister Judy Moody. Of course, he's hoping Judy is in a good mood so

she'll actually be helpful. Judy is busy plumbing her artistic talents by creating a masterpiece out of Already-Been-Chewed gum. At first she is reluctant to help her little brother study, but Stink manages to butter her up with some flattering words about her high intelligence. The deciding factor, though, is that Stink gives Judy permission to boss him around (everyone knows how much Judy enjoys that). Right away, Judy assists Stink by teaching him how to remember the names of all the planets. Of course, he is puzzled at first when she blurts out, "My Very Excellent Mother Just Served Us Nine Pizzas." When Judy explains that the first letter of each word represents a planet, Stink is awed by his sister's inventiveness. However, the next day's test results are a huge disappointment to the budding planet scholar. He learns that the Pizza in Judy's memory sentence is a problem. "P" may stand for "Pluto," but Pluto is no longer a planet, having been demoted by "the President of Outer Space" (at least according to Stink's version of the events). Stink is more disappointed than might be expected about Pluto's downgrading. He adores Pluto...and he relates to the smallest used-to-be-planet in the solar system. After all, Stink is the smallest kid in his class. Pluto is his second-favorite planet (he is loyal to Saturn), and he begins wondering what he can do to help this underdog ex-planet.
