Bloodline Of The Gods: Unravel The Mystery In The Human Blood Type To Reveal The Aliens Among Us

Synopsis

Are significant numbers of humanity the product of an ancient and advanced alien civilization? Have we, across the millennia, been periodically modified and refined as a species? In short, has our genetic make-up been manipulated by otherworldly beings that view human civilization as one big lab experiment? These are controversial and thought-provoking questions. They are also questions that demand answers, answers that may very well be found by examining those people whose blood type is Rh negative. The vast majority of humankind - 85 to 90 percent - is Rh positive, which means a person's red blood cells contain an antigen directly connected to the Rhesus monkey. This antigen is known as the Rh factor. Each and every primate on the planet has this antigen, except for one: the remaining 10 to 15 percent of humans. If the theory of evolution is valid - that each and every one of us is descended from ancient primates - shouldn't we all be Rh positive? Yes, we should. But we're not. The Negatives are unlike the rest of us. They are different. They are the unique individuals whose bloodline may have nothing less than extraterrestrial origins.

Book Information

Audible Audio Edition

Listening Length: 7 hours and 38 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Tantor Audio

Audible.com Release Date: March 22, 2016

Whispersync for Voice: Ready

ASIN: B01D0A0RH2

Best Sellers Rank: #123 in Books > Religion & Spirituality > Occult & Paranormal > UFOs #162 in Books > Religion & Spirituality > Occult & Paranormal > Ancient & Controversial Knowledge #429 in Books > Audible Audiobooks > Religion & Spirituality > New Age & Occult

Customer Reviews

This is one of several Nick Redfern books I have reviewed. I received an advance copy from Redfern's publicist, thus this review is made available before the book is actually released. Redfern's publicist always takes a risk when sending me a book for review, because I've written some harsh reviews of books they've sent. With Redfern's books, the risk is admittedly lower because I "get" his style and am a fan and follower. But that doesn't mean he's necessarily

safe! Redfern's books tend toward the "nonmainstream" side. This is one of the more "out there" ones he's done. As usual, he really gets you thinking about how various dots connect. Often in this genre, an author starts with a conclusion and pieces together facts (and fiction) with a little bit of faulty logic to "prove" his thesis. Redfern takes a variation on that approach, starting with a thesis and showing you that it's possibly true. That is a far more honest approach than what we see in, for example, our fake federal "elections" in which straw "candidates" spew one inanity after another. This book keeps with the Redfern tradition of looking at arcane facts to provide an interesting, compelling set of mini-stories. I want to be clear that Redfern doesn't take the position that "here is the fact of the matter" as so many authors in this genre do. He presents a case and kind of disclaims it at the same time. This strikes me as intellectually honest. It's a preponderance of the evidence approach, rather than a pretense of "beyond a shadow of a doubt." So you can draw your own conclusions or none at all. You'll still walk away entertained and more informed. Redfern's writing is always verbose.
