Customer Reviews

I'm in the process of reading this right now and finding myself rushing through my daily routines so I can get back to reading this book!! One of the best non-fiction books I've read in a very long time!!

Honestly I am of the people who are afraid to read things like this stories or even imagine them, I always thought that there are things beyond our understanding, I've even seen things, since I live near from a cemetery, even so I try to forget them, reading this I can say I'm a kind of masochist, but gradually I have been calling more attention to the issue of supernatural things, and I think the book has stories quite terrifying, I liked the book, just made me feel shaking chills!

I enjoyed this book because it contained some good stories, even though some of them were not in depth told, it was good enough to make you wonder and have a good time reading them, I have always been fascinated by the paranormal world and haunted places, and this book contains a good share of true stories about such, I definitely enjoyed it.

So I saw another commenter say that this book wasn't scary and I think it depends on your scare factor. I did find the stories to be super creepy just as the titles described. The creepiest for me where the stories that included details of Bethsheba, the Saran worshipping baby killer. She appears in a few of the stories and each one a little more chilling then the one before it. The story read more like fact then fiction which is to say there isn't any emotionally charged language or horror music playing in the background to dictate your mood when reading. There is a lot of information that would prompt some great horror movies if delved into a little more. Over all, I liked the creepy read and if love to do a haunted tour of some of the places mentioned...some not all. I'll skip the Bethsheba house for sure!

I will be honest.. I stopped reading this after the first story because the author discredits an entire religion (peaceful one at that) purely in the name of cheap thrills. On one hand he says we know

that witches worship the devil because this priest from several centuries ago watched some of their rituals. But then he goes on to say that some of what this dude said was too fantastic to believe. But oh, we should believe some of it because only some of it was lies. Get your facts straight before you write a book

An incitefull look into some of the more interesting cases of hauntings that many may know about.

B- for the stories. The stories were alright. I felt more research should have been done. For example, Summerwind, in Wisconsin, mysteriously burned to the ground, leaving the chimney and foundation. This is well documented.D for disorganization, spelling and grammatical errors. This book needed to be edited again.
