Proposals That Work: A Guide For Planning Dissertations And Grant Proposals

Synopsis

Previous editions of this book have helped well over 100,000 students and professionals write effective proposals for dissertations and grants. Covering all aspects of the proposal process, from the most basic questions about form and style to the task of seeking funding, Locke/Spirduso/Silverman's *Proposals That Work* offers clear advice backed up with excellent examples. In the fifth edition, the authors have included a discussion of the effects of new technologies and the Internet on the proposal process, with URLs listed where appropriate. In addition, there are new sections covering alternative forms of proposals and dissertations and the role of academic rigor in research. As always, the authors have included a number of specimen proposals, two that are completely new to this edition, to help shed light on the important issues surrounding the writing of proposals. Clear, straightforward, and reader friendly, *Proposals That Work* is a must own for anyone considering writing a proposal for a thesis, a dissertation, or a grant.

Customer Reviews

I rented this book and found it useful, so decided to purchase it in electronic version--only to find that I could no longer read it on my Kindle. Why make a book available electronically but not on an actual reading device? As it is, I do too much reading on a lit screen for my graduate school career, and the reason I have a Kindle is so that I can take my lightweight portable device anywhere and highlight, look up terms, bookmark etc. without staring at a lighted screen or having to sit in front of my computer to read. It's a good book, recommended by my advisor, but why on earth not make it

available on the reading device created? Especially when it was rentable on said device.

This is a great book if you're in a research methods class or starting your research proposal. It has some very practical information on grant writing and sources of research grants too. Highly recommend.

As a text required for a doctoral class in writing proposals for our dissertations, this text did outline the process and looked at what we need to do to continue our work towards completing this process.

Very readable, with the ring of truth. If my proposal actually **does** work, I'll be back to add a couple of stars to this review -

Need for school. Came in plenty of time!
