Stereoselective Heterocyclic Synthesis I (Topics In Current Chemistry) (Vol 189)

Synopsis

This two-volume set presents exciting new developments in preparative heterocyclic chemistry with a special emphasis on the stereoselective synthesis of - or with the aid of - heterocycles. A wide range of modern methods and strategies for the construction and synthetic elaboration of versatile heterocycles is surveyed in depth by leading researchers in this field. Due to the high quality and up-to-date coverage of each chapter, this two-volume set provides a valuable overview of the different aspects discussed and will at the same time be highly inspiring for the expert synthetic organic chemist as well as the non-specialist reader.

Book Information

Series: Topics in Current Chemistry (Book 189)

Hardcover: 169 pages
